

NOCTIS

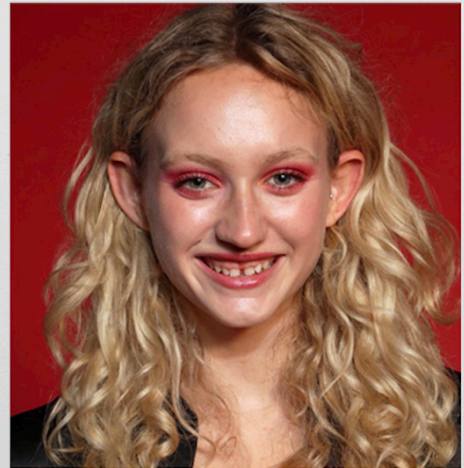

WINNIE

This Noctis is dedicated to the idea of unity. I have chosen to base this around inclusivity and that “No-one is perfect”. I myself have grown up “different” as I was born with a cleft lip and palate, but this hasn’t impacted who I am, I embrace it. I want to raise awareness that it is ok to be different as it makes you who you are !

In the past people who look/act different were seen as an attraction in a negative light thus being put into a freak show. I want this issue to be seen that people who have differences are the “Talent not the Attraction” throughout this magazine I have used a nod to a circus theme as the circus is where talented people go and people aspire of their talents.

For this issue I have used models from inclusive model agency Zebedee. As I wanted people like myself to be represented in the fashion world and that anyone, no matter your difference can be a model.
